swiftway

Swiftway's products as a total solution for businesses

Swiftway is a premium business provider of turnkey internet services based in Europe and the USA. The company has been in continuous operation since 2005 and offers its services to demanding firms in over 90 countries around the world.

Swiftway's product is a total solution for businesses. Competitors generally offer only simple unmanaged services while we explore how technology and services can help companies address their problems and challenges, and realize their possibilities, aspirations and dreams. We apply new thinking and ideas to create more simple, valuable and trusted experiences with technology, continuously improving the way our customers work. As the interactive media market and Internet market explodes, Swiftway is uniquely positioned to serve the needs of demanding clients worldwide.

Our staff of professionals offers our customers access to leading edge technologies that other technology firms are just starting to read about. Swiftway' s client list is varied; from financial institution and online traders to Internet Providers. They turn to Swiftway as their technology partner and design consultant.

Benefits

Swiftway offers its clients the highest level of professional guidance to help them plan, outline, build, and implement, successful Internet strategies. Swiftway benefits substantially through partnerships with leading technology and software companies.

Swiftway designed and owns its International network AS35017 connected to multiple carriers and hundreds of peers. Our in-house Network Operation Center allows us to offer complete end-to-end monitoring of the network 24 hours a day, 7 days a week.

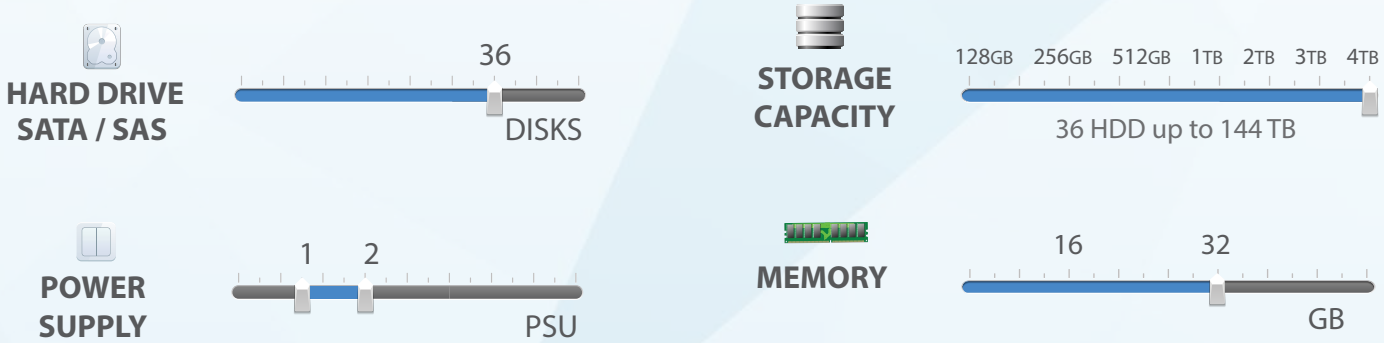
Choose your own server combination

Swiftway has built its entry level business class dedicated server solutions on proven server platforms from swiftway and Supermicro. These server platforms feature a powerful built-in KVM over IP solution with remote media support, as well as hardware health monitoring and the possibility to remote reboot the server in case your Operating System becomes non responsive.



Swiftway's legacy-free, low-cost networking services offer unmatched value to customers, even those with substantial bandwidth requirements. By using the latest state-of-the-art technology and innovative, efficient techniques, Swiftway sets the new standard for affordable, high-quality Internet Services.
